Outlook

Market Remains Challenging in Near-term

Source: EIA Short Term Energy Outlook, 09 May 2017

- Near-term oil demand / supply balance outlook remains uncertain
 - Extension of OPEC quotas and reaction of U.S shale are key variables
- Exploration spending likely to decline by a further 15% in 2017
 - Primarily due to lower exploration drilling spending as rigs roll over to contracts with lower day rates
- Exploration activity likely to be flat or could slightly increase
 - Some early signs of increasing activity – TGS has successfully increased backlog in Q1
- We still expect a challenging market with variability of seismic spend between quarters and across regions in the near term

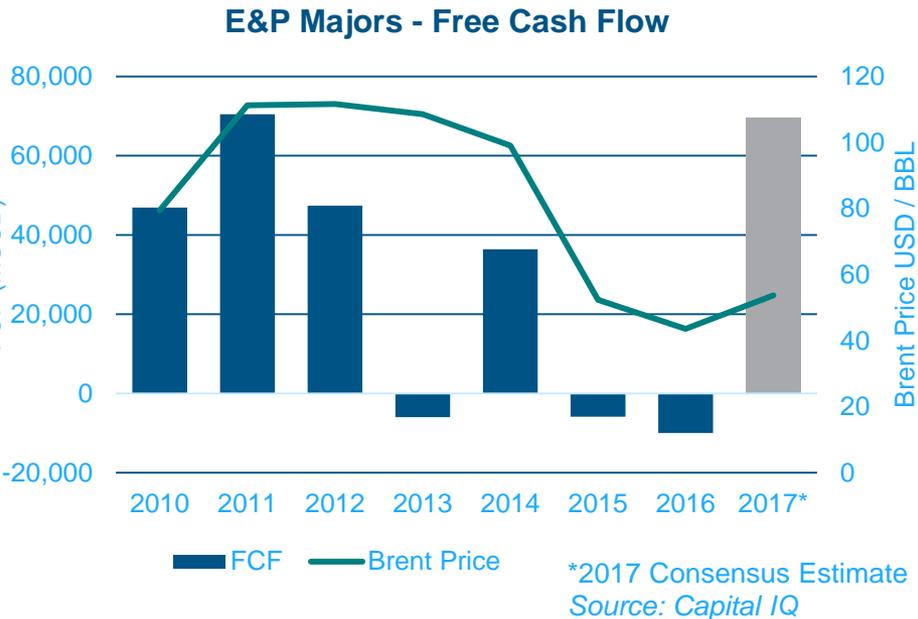

Industry Cost Reduction Driving Positive Free Cash Flow

“The first quarter 2017 was a strong quarter for Shell. Cash flow from operating activities of \$9.5 billion and free cash flow of \$5.2 billion enabled us to reduce debt, and cover our cash dividend for the third consecutive quarter.” **Ben van Beurden**

“The Group generated \$1.7 billion of cash flow after investments in Q1. The strength of the balance sheet and relentless pursuit of cost reductions allows the Group to launch new projects and acquire resources while fully benefitting from the ongoing deflation in the oil sector.”

Patrick Pouyanne

“First quarter earnings and cash flow improved significantly from a year ago. We benefitted from increasing crude oil prices and ongoing efficiencies being implemented across the company.”

John Watson

“Our year has started well. BP is focused on the disciplined delivery of our plans. First quarter earnings and cash flow were robust. The first of our seven new Upstream major projects has started up, with a further three near completion. We expect these to drive a material improvement in operating cash flow from the second half”

Bob Dudley

“Solid financial result and strong cash flow across all segments. We continue to capture efficiency gains and are on track to deliver an additional billion dollars in annual improvements in 2017.”

Eldar Sætre,

“Our Q1 results reflect an increase in commodity prices and highlight our continued focus on controlling costs and operating efficiently.”
